To Do (5)

- ☐ Change security

- ☐ An explanation of the what the app does and how it works.

- ☐ List unsolved problems which would be fixed in future iterations.

- ☐ A catalog of routes (paths and methods) that the API expects.

- ☐ Give feedback to the user after each action's success or failure.

In Progress (1)

- ☐ Need update password success message   Fp

Review

Done (69)

- ☐ Making frequent, cohesive commits dating back to the first day of the project week.

- [ ] Link to wireframes and user stories

- [ ] Sharing your work through a git repository hosted on Github.

- [ ] Document your planning, process and problem-solving strategy

- [ ] Link to Entity Relationship Diagram (ERD).

- [ ] Use a front-end Javascript app to communicate with your API (both read and write) and render data that it receives in the browser.

- [ ] Have semantically clean HTML and CSS

- [ ] User must be able to update a resource

- [ ] Use MongoDB, Mongoose, and Express to build an API.

- [ ] Create at least 4 RESTful routes for handling GET, POST, PUT/PATCH, and DELETE requests for a resource other than User.

- [ ] Any actions which change data must be authenticated and the data must be "owned" by the User performing the change.

- [ ] When pairing, include each developer's name in the commit message.

- [ ] List of technologies used

- [ ] A link to the other repo

- [ ] A link to both deployed sites

- [ ] At least 1 commit every day during project week (not necessarily on both repos).

- [ ] Both front-end and back-end repos should include README's with:

- [ ] As a user, I want to be able to download any file.   Aj

- [ ] Be deployed online, where the rest of the world can access it.

- [ ] All repositories must have commits from every team member.

- [ ] Clear upload form on close and successful upload

- [ ] Test with files other than images

- [ ] Test download capability with correct URL

- [ ] Sign in and Sign up buttons not active when you close out of modals in production

- [ ] Prod Bug: Fade out not working when switching between modals for sign in/ sign up - page is not selectable

- [ ] Prod Bug: Browse button not working to select a file

- [ ] Clear change password form when closing

- [ ] Clear sign up form when modal is closed

- [ ] Pin both repositories on GitHub as a Popular Repository   Aj

- [ ] Fix broken web search again　　　　　　　　　　　　　　　　　Rs

- [ ] Deploy server application on Heroku.

- [ ] Add display of tags　　　　　　　　　　　　　　　　　　　　　Aj

- [ ] Deploy client application on GH pages.

- [ ] Host on your public Github page, not Github Enterprise.

- [ ] As a user, I want to be able to edit a file that I am the owner of.　　Fp

- [ ] Fix sign-in / sign-up modals to avoid stacking　　　　　　　　　Aj

- [ ] Refresh and show new upload when adding a new upload　　　　Mg

- [ ] Bug: Search image not working

- [ ] Show message when you have no images to display (your own)　　Mg

- [ ] Add branding for "Xobpord"

- [ ] Bug: Can't upload without a tag selected

- [ ] Create error message if you select save/upload without first selecting a file　　Mg

- [ ] Add functionality to clear and close modal upon successful upload　　Mg

- [ ] When removing your own file in Get My Files view it reloads to Get All Files view　　Mg

- [ ] Re-test see my files after security is complete   Mg

- [ ] 1 commit on the first day of project week on both repos.

- [ ] As a user, I want to be able to see my files.

- [ ] Hide Upload and Change password and Sign out when not signed in   Aj

- [ ] Logout when logged in.

- [ ] Login with email and password.

- [ ] Have at least 1 resource that has a relationship to User

- [ ] Change password with current and new password.

- [ ] Signup with email, password, and password confirmation.

- [ ] As a user, I want to be able to delete a file that I am the owner of.

- [ ] Ability to add files when tags have been implemented

- [ ] As a user, I want to be able to see all files.

- [ ] Add field to add tags   Aj

- [ ] As a user, I want to be able to upload a file   Fp

- [ ] Sign in automatically on sign-up   Fp

- [ ] As a user, I want to be able to create an account.   Rs

- [ ] CURL on INDEX-ALL Resources   Mg

- [ ] As a user, I want to be able to sign in to my account.   Rs

- [ ] As a user, I want to be able to sign out of my account.   Rs

- [ ] As a user, I want to be able to change password on my account.   Rs

- [ ] CURL on SHOW owners Resources

- [ ] CURL on DELETE Resource   Mg

- [ ] CURL on UPDATE owners Resources

- [ ] CURL on SHOW one Resource by ID

- [ ] Crud on Create Resource   Mg
